Moxi™ S-R  
RIC

ChargerGo RIC S

### 360 Conversation in Car

A manual program that focuses on speech in a car, regardless of where people are sitting.

### AntiShock™

Instantly suppresses sudden, loud and irritating sounds without affecting speech.

### AutoFocus 360 (tech level 9)

AutoFocus 360 uses a binaural network of four microphones to determine where speech is coming from. It automatically steers the beamformer and also applies dynamic noise reduction when speech is from the front.

### AutoFocus (tech level 7)

AutoFocus uses a binaural network of four microphones to determine if speech is coming from the front or another direction. For all directions (other than front) it activates a fixed-wide directional pattern. For speech from the front, AutoFocus adjusts the beamformer forward and applies dynamic noise reduction.

### Automatic Adaptation Manager

Automatically and quickly helps transition new wearers from a comfortable first fit to a full target fitting.

### AutoMic (tech level 1)

Works continuously in quiet environments to provide awareness and listening comfort, and in noisy environments to emphasize speech and minimize background noise.

### Binaural Acoustic Phone

Wirelessly streams audio signals from the cellular or landline phone ear to the other ear without a separate accessory.

### Coach

Helps your clients integrate hearing instruments into their lives with personalized, timely and helpful tips, reminders, and advice.

### DuoLink

Provides binaural coordination of program/volume changes for each of the available hearing instrument user controls.

### Dynamic Noise Reduction

A spatial noise canceller within AutoFocus, AutoFocus 360 and HyperFocus that reduces interfering background noise in conversations to focus on speech from the front.

### Equalizer

Provides clients with the ability to customize their sound by making independent (and persistent) changes to bass, mid and treble in any program within the Remote Plus app.

### Feedback Manager

Uses phase cancellation to instantly suppress annoying whistling or feedback.

### First Fit

Enables you to fit your clients in as few as four clicks while facilitating easier adaptation for new hearing instrument wearers.

### FLEX:TRIAL™

Allows your clients to experience amplification outside the clinic and in the real world where they live, work and play.

### Frequency Compression 2

Compresses high-frequency sounds, that would otherwise be inaudible, into lower, more audible ranges.

### HyperFocus

For face-to-face conversations in loud noise, HyperFocus engages within the conversation in loud noise environment, applying a more highly-focused, binaurally created beam to the front.

### Integra OS

An advanced signal processing system that combines powerful binaural communication and automatic optimization of sound performance. It classifies the sound environment and adjusts accordingly.

### Log It All

Captures real-life data enabling you to give more personalized recommendations to your clients based on their real-world listening lifestyle.

### Media

Allows the hearing instruments to classify streamed speech and streamed music.

### Microphone Mode

A range of microphone options is available ranging from omni to adaptive directional with defaults set depending on technology level and automatic environment or manual program.

### Noise Reduction

Detects competing background noises and reduces their volume accordingly.

### Pinna Effect 2

Uses a binaural network of four microphones to apply targeted directivity variably and asymmetrically across the frequency range to minimize the impact of acoustic cues typically lost with hearing instruments.

### Pinna Effect

Applies a small degree of directivity in the mid and high frequencies to minimize the impact of acoustic cues typically lost with hearing instruments.

### Ratings

Allows your clients to provide in-the-moment feedback through the Remote Plus app, while capturing hearing instrument settings to help make your counseling more efficient and personalized.

### Remote Adjust

You can make fine-tuning adjustments and deliver professional care that's convenient for you and your clients, no matter where they are.

### Remote Plus app

A smartphone app that is a remote control for hearing instruments, offers clients personalization features, and gives HCPs insights to provide the best level of care.

### Soft Speech

Enhances the subtle nuances of speech without amplifying low-level environmental noise.

### Speech Enhancement

Boosts speech by increasing the volume of voices during conversations.

### Success Check

Allows you to view your client's usage data, Log It All score, Ratings and more – receive alerts to successes or barriers without the need to connect hearing instruments to fitting software.

### Tap Control

Accelerometer that detects a double tap and enables easy access to Bluetooth functionalities.

### Tinnitus Masker

Noise generator intended to provide a sound enrichment source.

### Wind Control

Automatically reduces wind noise.

# Guidelines for online sales and distribution of products of Sonova Hearing India Private Limited

Effective: 1<sup>st</sup> June 2019

Sonova Hearing India Private Limited ("SHIPL"), sells medical devices including hearing aids and wireless hearing accessories (the "Products") in India inter alia which bear the trademark and brand of "Phonak" and "Unitron". In the Indian market, SHIPL sells its Products through its authorised distributors and dealers, who provide high standards of best practices, including in hearing assessment, fitting, programming and subsequent rehabilitative services to its patients. Authorised dealers follow a recommended protocol and have knowledge of SHIPL's technology, skills and/or expertise are regards the suitability, programming and fitting of the Products and software, therefore in an individual appointment they are able to provide patients with numerous value added services including but not limited to, (i) evaluation of the patient's hearing loss through an audiometric test, (ii) select the right technology for the patient as per the patient's needs; (i) fine-tune the hearing aid fitting with available software based on patient-specific behavioural measures and (ii) provide counseling and aural rehabilitative services relative to the patient's specific needs, including care and maintenance of the hearing aid, (iv.) replacements and (v.) instructions on hearing aid features, such as how to utilize it with wireless systems by applying their knowhow of the Products. Due to such services and support provided to the patients, it is beneficial to the patients that the Products are provided beyond our authorised distributors (who sell to our dealers) and our dealers. In addition, it is SHIPL's right to protect the sanctity of its distribution channels, including both online and offline sales, in an attempt to safeguard the good will and reputation of its Products and its brand image Every seller who wishes to sell SHIPL's Products online is required to obtain prior written approval from SHIPL for the sale of its Products. In this manner, the risks associated with online sales of its Products are minimized by SHIPL. SHIPL will, without assuming any liability, refuse to accept sales of its Products made through online market places by any seller or by e-commerce platform (not being an authorized distributor or dealer of SHIPL, who fall under the subsequent paragraph), and no after sales and warranty may be granted by SHIPL (at its discretion) in relation to such un authorised sales.

The above mentioned guidelines are also applicable to all authorised distributors and dealers of SHIPL, who are hereby restrained from using, marketing, advertising, displaying or supplying for sale, SHIPL's Products on any online platform without the prior written approval of SHIPL. SHIPL will independently determine noncompliance of the above guidelines. In the event an authorized distributor or a dealer does not comply with the above guidelines, SHIPL may take action against such authorized distributor [s] and dealers, including discontinuation of its engagement with them. As on 1st June 2019, SHIPL has not authorized any person, proprietorship, firm., company or e-commerce marketplace to sell its Products online. Anyone found listing, selling, marketing, advertising, displaying or supplying for sale, SHIPL's Products on an any online marketplace or e-commerce platform and displaying SHIPL's images and logos in connection with such sale, without obtaining prior written approval from SHIPL, will be considered as infringing SHIPL's intellectual property rights and may be subject to legal proceedings at its sole risk and cost.

\* Price list effective from 1st June, 2026
